

Kayflow™

Drainage Systems

Waste Water Systems

The New Waste Water range further extends Kayflow's drainage offering, adding to the existing portfolio of Rainwater, Soil and Underground products. The new range consists of three systems; Push Fit, Solvent Weld and Overflow.

- Push Fit – 32mm & 40mm (White, Black & Light Grey)
- Solvent Weld – 32mm, 40mm & 50mm (White, Black & Olive Grey)
- Overflow – 21.5mm (White)

As the name suggests, the Push Fit waste profiles comprise of connections that 'push' and 'fit' together with ease, requiring no adhesive or sealant to the joints as they contain rubber seals which connect together on contact. The joints are therefore not permanent, enabling any future adaptations to be made to the system with ease, if the need arises. This system allows for a speedy, flexible installation.

The Solvent Weld range of fittings are joined together using PVC cement, which creates a strong, watertight, chemical bond. This installation method is ideal for tight spaces as the fittings are low profile and they provide an impact resistant and permanent waste water solution.

The Solvent Weld 21.5mm Overflow system is used for managing excess water produced by cisterns, boilers and water tanks. These durable PVC profiles are lightweight and watertight.

Solvent Weld Pipe - BS5255
 Push Fit Pipe - BS EN1451
 Solvent Weld Mouldings EN1329-1
 Push Fit Mouldings - EN1451
