

FOR INTERNAL USE ONLY

# Kayflow™

domestic & commercial guttering, underground and soil systems

## Kayflow Inspection Chambers - EN13598-1

We are delighted to inform you that our Kayflow Inspection Chambers are now fully certificated and comply to **BS EN 13598-1:2020**.

The standard relates to plastics piping systems used in non-pressure underground drainage and applications. The standard covers ancillary fittings and shallow chambers made from materials such as unplasticized poly (vinyl chloride) (PVC-U), polypropylene (PP), and polyethylene (PE), ensuring compliance with safety and performance standards for effective drainage and sewerage management.

This applies to both the **320 Inspection Chamber** and **450 Inspection Chamber** systems and should help to provide reassurance to your customers when offering this product/range to market

**Visit the Technical Hub on our new website for any additional technical queries. If you have any further questions about the above, you can contact the Technical Department on 01827 317 200 or e-mail [technical@swishbp.co.uk](mailto:technical@swishbp.co.uk).**
